**Note:** The "Current Inventory" column(s) reflect the number of active(on market) listings on the 30th day of each month. The "Months Inventory" column(s) value(s) equal "Current Inventory" divided by "Monthly Sales". This reflects how many months it would take to sell out of inventory at the current month's rate of sale.

- Total Months Inventory = Total Current Inventory / (Total Monthly Sales/12 Months)
